

## Chewies chewing roots

### The alternative to sticks: sustainable & robust

Our chewing roots are very robust and almost indestructible. They provide species-appropriate activity for the well-being and happiness of all dogs. At the same time, they are made of a sustainable and 100 % natural, untreated chewing material: the hardwood of a Mediterranean heather bush that grows wild in Italy's forests. These unmanaged areas must be regularly freed from bushes for fire safety reasons. The firm roots have a compact structure that is very sturdy while encouraging gnawing and chewing. The vegan chewing bulbs are calorie-free and, unlike sticks from the forest, also low-risk. They dissolve into flaky platelets when chewed by the dog, which become soft when combined with saliva and are harmless when swallowed. Our chewing roots provide species-appropriate activity, which can support dental care at the same time. For all four-legged friends who love to chew.

**Chewies – 100 % dog!**

## PREMIUM

- ✓ 100 % natural and ecologically obtained
- ✓ Plastic-free, natural chewing toy
- ✓ Low-risk alternative to splintering sticks in the forest
- ✓ Calorie-free
- ✓ Can support dental care
- ✓ Vegan
- ✓ Available in 3 sizes
- ✓ Very durable and robust (chewing resistance +++)
- ✓  Made in Germany

### Chewies chewing root

# S

Ideal for dogs <20 kg

Size	Item no.	PU
