DOGS!

Chewies WILDE OHREN

PREMIUM

Chew off an ear from time to time

What dog doesn't relish chewing on something? Ideally on a suitable chewing product with useful added value. Here we have something – a purely natural product, fresh from the hunter: Deer ears. What makes them the ideal snack? Quite a lot. Traditionally dried, Chewies WILDE OHREN do not need preservatives. We use only the highest quality 100 % venison from Germany. Moreover, the drying process produces a wonderfully intense and natural taste. This makes our deer ears a true favourite snack. What's more, they are also grain-free and monoprotein, so they are ideal for any nutritionally sensitive furry friends on an exclusion diet. Chewies WILDE OHREN are available in 2 versions: ears with fur and the base of the ear. The ears with fur are not only delicious and wholesome. Deer ear fur can support natural intestinal care. And at the same time, it creates a flossing effect. Chewing on them can contribute to dental care. And for all four-legged friends who like the intense flavour, the ear base is the perfect snack. Chewing also reduces stress and satisfies the natural urge to chew. The ideal activity and reward.
